EDUCATION

University of California, Los Angeles (UCLA), Los Angeles, CA Expected June 2026

Bachelors of Science in Mathematics of Computation

El Camino College, Torrance, CA June 2024

Associate's in Mathematics

- Academic Achievement in Computer Science and Awarded Forrest G. Murdock Leadership Award
- Wayne and Margaret Bemis Scholarship for Sciences, Dean's List (Fall 2022, Spring 2023, Fall 2023, Spring 2024)

EXPERIENCE

Magnakom, Los Angeles, CA November 2025 – Present

API Developer

- Built Python/FastAPI services and Next.js/React tools to automate e-commerce workflows across inventory, sales, and internal operations, reducing manual data entry by 40%.
- Integrated OpenAI APIs, REST APIs, regex-based parsing, and validation pipelines to process 1000+ records/orders/products with improved accuracy and fewer manual review steps
- Created Excel-based reporting and analysis workflows for operational data, improving visibility into sales and inventory trends for Magnakom team.
- Debugged and optimized API endpoints and internal tools in Agile development cycles, improving reliability and reducing recurring workflow issues by 30%.

NASA Jet Propulsion Laboratory, Pasadena, CA June 2025 – August 2025

Engineer Fellow

- Revised the E.Z.I.E. OSSE simulation framework using Python, MATLAB, and C++ to support new measurement capabilities and validate model outputs against real mission datasets.
- Processed and compared over 50GB of simulated and actual EZIE mission data to evaluate model accuracy and derive magnetic field characteristics for auroral space weather research.
- Built scientific computing tools that streamlined simulation analysis workflows, reducing repetitive data-processing steps by 400%.
- Collaborated with JPL and UCLA researchers on remote sensing and Earth science modeling workflows, contributing analysis used for mission validation and scientific interpretation.

Hire Henry, St. Louis, Missouri March 2025 – Present

Software Engineer I

- Developed and deployed 5+ full-stack web and mobile features using Flutter/Dart, JavaScript, HTML/CSS, Python, and Java.
- Owned 3+ project deliverables from planning through release, including implementation, testing, QA, and deployment readiness.
- Resolved 30+ software bugs while improving code quality, documentation, and application reliability.
- Built 8+ low-fidelity prototypes to validate design concepts and support rapid product iteration.
- Evaluated 2+ emerging tools and frameworks, delivering technical recommendations to support development decisions.

PROJECTS

AI Flashcards & Stripe, Los Angeles, CA July 2024 – August 2024

Software Engineering

- Spearheaded development of an AI web application to assist in helping in hundreds of different flashcard creation, organization, and review for students and professionals helping improve productivity by 10%.
- Architected and built a dynamic and scalable application using Next.js, React, Firebase, and Stripe for seamless user experience and payment integration.

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, MATLAB

Web & Backend: FastAPI, React, Next.js, Node.js, REST APIs, OpenAI API

Mobile & Cloud: Flutter, Firebase, Google Maps API, WebSocket

Foundations: Data Structures, Algorithms, Linear Algebra, Probability, Scientific Computing
